ERSİN İŞGÖR

FULL STACK WEB DEVELOPER

I am a full-stack web developer with a background in civil engineering. My extensive engineering background has given me the ability to simplify complex problems, attention to detail, organisation and team management skills. I have a great interest in coding because of my interest in problem solving. As someone who has embraced lifelong learning, I am constantly focused on keeping up to date and improving myself. I was trained as a full stack web developer at Siliconmade Academy. During my education, I improved myself in database management, RestAPI, layered architecture, and dynamic user interface creation using JavaScript, C#, .Net and MsSQL technologies. I am currently studying Computer Programming at Anadolu University Open Education Faculty. I continue to learn new technologies and specialise in this field with great enthusiasm.

SKILLS

Proficient : HTML | CSS | JavaScript | C# | MsSQL | Bootstrap
ASP.NET | Visual Studio | ASP.NET MVC | Terminal
ASP.NET Core | VS Code | Git

Familiar : WordPress | MongoDb | Node.js | React.js
Sass | Tailwind

EDUCATION

SILICONMADE ACADEMY
Full Stack Web Development Bootcamp   *2023 - 2024*

ANADOLU UNIVERSITY
Computer Programming - Open Education   *2023 - present*

SAKARYA UNIVERSITY
Master Degree of Business Administiration   *2013 - 2015*

SULEYMAN DEMIREL UNIVERSITY
Bachelor Degree of Civil Engineering   *2005 - 2009*

PROJECTS

Quiz App
This project is a quiz app built with JavaScript. The quiz app is implemented using object-oriented programming principles and makes use of an UI object to handle interactions with the DOM.

Tic Tac Toe
The gameplay logic is implemented with JavaScript. The Game object is created using the module pattern, which allows us to encapsulate private variables and functions.
